

In the past decade, subsidy policies aimed at demand-side of photovoltaic (PV) supply chains have created a dilemma. While they foster the growth of the PV industry, they also induce ...

The African country of Cameroon will exempt solar modules from import duties and other taxes starting from January 1, 2024. The exemption also applies to drinking water, biomass and ...

Safety innovations including multi-stage fire suppression and gas detection systems have reduced insurance premiums by 30% for container-based projects. New modular designs enable capacity ...

The study's aim is to identify and analyze opportunities and challenges facing renewable energy technology (RET) penetration in Cameroon. The strengths-challenges-opportunities ...

Finally, a real-world container transportation network is used as a case study to analyse the impacts of different CO<sub>2</sub> emission reduction targets, shore power subsidies, and OD demand on the optimal ...

The Chinese Government has issued numerous regulations that significantly affect the number of photovoltaic (PV) installations in the country and the subsidies for their use. This article summarizes ...

Introduction Governments worldwide are actively driving the renewable energy transition by continuously introducing or adjusting solar subsidy policies to accelerate photovoltaic project ...

Subsidy policies, as economic incentives to encourage low-carbon transport modes, have been experimented in various regions around the world. Table 1 lists several subsidy policies ...

The Chinese government announced subsidies for renewable electricity generation from wind, solar, and biomass for local public utilities and power generation companies in 2024, with the decision made on ...

We study the effects of subsidies on the short-run and long-run adoption of solar lamps in rural Cameroon, where most people do not have access to on-grid electricity and rely on kerosene ...

To save energy and reduce carbon emissions, subsidy policies have been implemented to improve the competitiveness of railway and waterway transport in the multimodal transport system ...

The literature is highly segmented: many studies address individual technologies (e.g., solar or hydropower) from a technical modeling perspective, others focus narrowly on policy ...

Our reflection will focus on three axes: the inventory of Chinese investments in Cameroon and their local perception (1); the legal framework governing foreign investments in ...

However, the diffusion rate varies according to the incentives and policies implemented by the countries. Because solar systems can be considered the new and incentives-policies act as a ...

The maximum subsidy available for solar without storage is PLN 6,000, increasing to PLN 7,000 for solar micro-installations with storage. Any solar installations connecting to the grid after Aug. 1 must be ...

The model examines three policy scenarios: the Business-as-Usual, SC1 scenario involving a stable 100% increase in PV investment, and SC2 scenario featuring a stepwise 5%-100% ...

This evidence confirms that VAT and customs duty exonerations have supported a rise in energy access and proliferation of solar equipment in Cameroon, contributing to its renewable ...

The solar systems importation guide is a manual that aims to guide the actors in the sector and the potential investors on everything related to importing solar equipment into Cameroon. It is one of the ...

This paper investigates the optimal container subsidies for shippers to promote intermodal shipping involving waterways in a regional transportation network. We consider a linear ...
