

Iraq. These models were used to evaluate the impacts of integrating solar PV, electric vehicles (EVs), and battery energy storage systems (BESS) on voltage profiles and active power losses.

The increasing adoption of electric vehicles (EVs) and the corresponding surge in lithium-ion battery (LIB) production have intensified the focus on sustainable end-of-life (EOL) ...

The charging of electric vehicles in standalone and grid-connected photovoltaic systems is covered in this paper, along with an explanation of the various modes of operation for these systems.

Abstract - Automatic Guided Vehicle (AGV) has been widely applied in automatic logistics system because it provides flexibility and efficiency. This paper addresses review and design of multi AGVs ...

The increasing demand for energy and the climate change caused by CO<sub>2</sub> emissions have made electric vehicle (EV) technology necessary in the transportation sector. As the number of ...

This paper presents a comprehensive literature review to gain a better understanding of the state-of-the-art research efforts related to charging station (CS) planning, operational ...

The article also discusses how electric vehicles and renewable energy are growing in the electricity industry. Clean and sustainable energy mixes include solar, wind, hydro, and biomass.

Electro-mobility plays a key role to achieve climate neutrality. Electric vehicles, partially powered by vehicle-integrated photovoltaics, are now emerging in the market. This study reviewed ...

This paper presents a solar photovoltaic (PV) based electric vehicle (EV) charging system with the ability to charge the EV battery storage system and with vehicle to grid (V2G) operation to support power ...

Electric Drive and Energy Storage System for Industry Modular Mobile Container Platform, Feasibility Study Pavel Jandura\* Josef &#196;OEernohorsk&#195;&#189;\*&#197;&#161; Richter\*\* \*Institute of ...

Key players are crucial in tackling these difficulties to improve electric vehicle integration into the grid. The study determines the most effective ways for distributing and providing ...

This study reviewed more than 270 articles on solar electric vehicles. Eight main topics were identified: solar races, vehicle design, powertrain systems, photovoltaic systems, system ...
