

Home solar container australia

What is a solar container build?

It's a modified shipping container built to house solar panels, batteries, inverters, and other off-grid power systems. These units are ideal for powering remote sites, construction camps, emergency setups, or as a portable backup energy system. What's included in a solar container build?

Why do you need a solar container?

Our solar containers are built tough to protect solar panels, batteries, and inverters from harsh weather and unauthorised access. We can include insulation, ventilation, cable management, and specialised layouts to suit your specific solar setup requirements.

Are solar containers safe?

Yes-- all solar containers are built from weatherproof, lockable shipping containers. Your gear is safe from the elements and secure from unauthorised access. Can the system be expanded later on?

What does a modbox solar container include?

A typical ModBox solar container includes battery storage, inverter setup, internal racking, cabling, ventilation, and secure access. We can also include external solar panel mounting or integrate with your existing array. Can I use a solar container to power other ModBox units? Absolutely.

Why should you buy a modular home in Australia?

It's ideal for off-grid living, holiday stays, temporary housing, or even a permanent rural retreat. These modular homes come pre-fitted with essentials like plumbing, electricity, and insulation. Additionally, these homes are portable, quick to set up, and built for the unique Australian climate.
