

How to make a solar container light bulb

How do you make a solar bottle bulb?

To construct a solar bottle bulb, you'll first need to find an empty plastic soda bottle, a gallon of distilled water, a gallon of bleach, some household sealant, and some sheet metal. Once you've acquired all your materials, cut a hole in the sheet metal and slide the bottle through.

How does a solar bottle bulb work?

The water in the bottle refracts sunlight, dispersing it effectively within the room. For aesthetic purposes, you can paint or decorate the exposed part of the bottle to match your roof. Solar bottle bulbs are an excellent source of light in areas without electricity or during power outages.

How do you install a solar bottle bulb on a roof?

Cut a hole on the roof, similar to the bottle circumference. Apply rubber sealant around the hole. Place the solar bottle bulb into the hole. Make sure it is firmly in place. Drill 3-4 holes on each side of the solar bottle bulb and put in the rivets. Apply rubber sealant on all sides of the GI sheet of the solar bottle bulb to avoid leakage.

Can a solar bottle bulb be used as a light source?

However, for adding light to a temporary structure or a playhouse for kids, a solar bottle bulb can be easily fashioned. Decide which area of the home/room will be the best place to add the bottle bulb. Consider where the majority of the living is done and/or where you need a light source the most.

How to charge a solar bottle lamp?

Take an empty soft drinks bottle and clean it thoroughly. Fill the bottle with water and add a few drops of chlorine to avoid algae formation. Close the bottle with Solar Bottle Lamp and your lamp is ready. The lamp can be charged in two different ways: 1. Solar Charging 2. USB Charging Before the first use, it is recommended to charge the battery.

How do you make a light bulb?

Typically bulbs will be created from either 2 liter (0.5 US gal) or 8 ounce clear, plastic empty soda bottles so evaluate your space first. Pick up empty plastic soda bottles. Remove the label and thoroughly wash the inside and outside of the bottle. Keep the bottle cap. Pick up a gallon of distilled water and a gallon of bleach.
