

Much research earlier reported that only productivity enhancement using the concept of integrating reflectors in conventional solar stills. However, given the current economic and ...

The selection of PCM necessitates meticulous evaluation, considering aspects like cost, compatibility with the container, and its environmental implications, all of which have been ...

The global mobile solar container market is experiencing robust growth, driven by increasing demand for off-grid and temporary power solutions across diverse sectors. The market, ...

This work reviews thermal performance and exergy analysis of various design attempts of solar stills (SS) used at the local level. SS is an economical and simple device particularly for rural ...

The productivity of the conventional solar still is very low. Thus to augment the productivity of the solar still, several research works are being carried out [3]. The performance and ...

The global solar container power systems market is experiencing robust growth, driven by increasing demand for reliable and sustainable off-grid and backup power solutions. The market, ...

This review study analyses the advantages and limits of several solar still designs, including passive single slope, double slope, and other forms of active solar still with varied ...

This research presents an early-design analysis of single-family housing located in Calgary, Canada; and combines energy analysis, life cycle assessment (LCA), and life-cycle costing ...

Solar container market was valued at \$220.0 million in 2024 and is projected to reach \$2,148.3 million by 2035, growing at a CAGR of 23.0% during the forecast period (2025-2035).

Meanwhile, the offshore solar energy is also drawing more and more attention from the academic communities. A novel concept of a floating wind-solar-aquaculture (WSA) system, combining multiple ...

Concept in a Box ® Container Concepts ® Container Concepts® creates eco-friendly, turnkey container restaurants, bars, and retail spaces using recycled shipping containers. With expertise in food service ...

The solar desalination process is carried out in a container-like structure named solar still made up of heat-conducting materials, namely copper, aluminum, Galvanized iron (GI), and ...
