

Is there a subsidy for solar container

Do we need a subsidy for wind & solar projects?

Some form of subsidy will therefore remain necessary. Given that the EU Electricity Market Design Directive prescribes CfDs (or an equivalent) for any form of state aid for renewable electricity generation, it is envisaged to make CfDs available for new onshore wind and solar projects.

Is it irresponsible to halt wind and solar subsidies after 2025?

However, according to outgoing Minister for Climate and Energy Rob Jetten, it is irresponsible to halt all subsidies after 2025 since this would lead to a stagnation in the deployment of onshore wind and solar projects. Some form of subsidy will therefore remain necessary.

Why does Germany need a solar-plus-storage subsidy?

That compares to the effective 100% requirement that solar-plus-storage projects used to need in order to qualify for an investment tax credit (ITC) in the US, and still do for Germany's Innovation Tender. The subsidy is needed because BESS co-located with PV are 'not profitable', the government said.

Will there be new SDE++ subsidies in 2025?

Pursuant to the Climate Agreement (Klimaatakkoord) beginning 2025 no new SDE++ subsidies will be provided. However, according to outgoing Minister for Climate and Energy Rob Jetten, it is irresponsible to halt all subsidies after 2025 since this would lead to a stagnation in the deployment of onshore wind and solar projects.

How much does a kWh subsidy cost?

The initial estimate for the subsidy is EUR0.14-29 per kWh of energy discharged. Independent research and consultancy organisation CE Delft has been heavily involved in the analysis of the scheme until now.

Can I buy solar panels without paying VAT?

Currently, there is no more VAT on solar panels, which means you can buy solar panels without having to pay any extra taxes on top of the initial purchase costs. The netting scheme (salderingsregeling) is an arrangement where you can earn money for the excess energy your solar panels generate.
