Will China build a 100-megawatt solar plant in Botswana?

A group of Chinese companies, led by China Harbour Engineering Co., has won a contract to build a 100-megawatt (MW) solar plant in Botswana. This development is part of China's commitment to clean energy and sustainable development.

How much does Botswana's solar project cost?

The project is a key development in Botswana's renewable energy sector, marking the country's second utility-scale solar facility. The contract, which is valued at \$78.3 million, includes partnerships with China Water and Electric Development Co. and local investors.

When will Botswana's second solar power plant be completed?

The project, which is Botswana's second utility-scale solar facility, is set to be completed in the second quarter of 2026. Botswana has awarded a major contract to build a 100-megawatt solar power plant to a group of Chinese companies led by China Harbour Engineering Co.

Who is Sinotswana Green Energy?

The agreement is in place between Botswana Power and Sinotswana Green Energy, a consortium of Chinese and Botswana companies, jointly established by China Harbour Engineering Co., China International Water and Electric Corp., and New Energy Company Proprietary Ltd., a local company. A tender for the project took place last year.

Where is Scatec ASA building a solar power plant in Botswana?

In March, Scatec ASA began construction of a 100-megawatt solar power plant in Botswana's northeast. The initial 60 megawatts of this project are expected to come online by the end of this year. The Ministry of Minerals and Energy is also working on additional renewable energy projects.

How long will Botswana Power Plant last?

The deal involves an engineering, procurement and construction contract, with operation and maintenance of the power plant for 25 years. The facility is expected to start generation by the end of 2025. Botswana's President, Mokgweetsi Masisi, said the project is a key milestone in the country's energy transition.
