

# Many containers of south african solar container have not been picked up

How many solar panels are imported outside of South Africa?

Over the last two years, the imports of solar panels outside of South Africa have nearly tripled from 3,734 MW to 11,248 MW. The rise happened across Africa. 20 countries set a new record for the imports of solar panels in the 12 months to June 2025. 25 countries imported at least 100 MW, up from 15 countries 12 months before.

Is a solar pick-up happening in Africa?

The latest data provides evidence that a solar pick-up is happening at scale in many countries in Africa. Solar is not new to Africa. For more than two decades, solar has helped improve lives across Africa, in rural schools and hospitals, pay-as-you-go in homes, street lighting, water pumping, mini-grids and more.

Will solar take off in Africa?

However, South Africa and Egypt are currently the only countries with installed solar capacity measured in gigawatts, rather than megawatts. That could be about to change. The first evidence of a take-off in solar in Africa is now here: The last 12 months saw a big rise in Africa's solar panel imports.

What makes our containerised solar power generation units special?

"What makes our containerised solar power generation units special," says Tobias, "is our use of international quality engineering and components, while still producing local content that allows us to offer a price advantage and local support. We pride ourselves that our energy solutions are made in Africa for Africa."

How many solar panels did Africa Import in 2025?

Africa's solar panel imports set a new record in the 12 months to June 2025, reaching 15,032 MW-- a 60% increase on the 9,379 MW imported in the preceding 12 months. The last time imports surged was in 2023, when South Africa solar imports picked up as the power crisis hit its peak.

Are solar panels going up in South Africa?

In the last two years, the imports of solar panels have tripled outside of South Africa. They rose from 3,734 MW in the 12 months to June 2023, to 11,248 MW in the 12 months to June 2025. The increase in imports is more than a single month spike. Monthly imports jumped to a record in December 2024, but have consistently elevated since.
