

Monaco water storage

Does Monaco have a safe water source?

Notes: Years with missing data left empty. Water use can include water used and then returned to its source (renewable resource). The entire (100%) population of Monaco has access to a safe-drinking water source.

How does Monaco's water system work?

Monaco's water is stored in seven reservoirs, which are then distributed through a network that transports almost 5,000,000 m³ of water per year. Thanks to an excellent policy of finding leaks and replacing pipes, the water network's performance is one of the best in the world.

How much water does Monaco get per hour?

This rediscovered well now supplies Monaco with between 25 and 50 cubic meters of water per hour, bolstering the Principality's independence from French water sources and ranking among its most prolific supplies.

Did Monaco activate a new water source in 2023?

by Jack Brodie | Oct 28, 2024 | News In June 2023, Monaco activated a new water source, the Annonciade well, tapping into the historic Vaulabelle spring, which had been out of use since the 1990s.

Where does Monaco's water come from?

Since storm Alex hit southern France in 2020, causing flooding around the Mediterranean, Monaco can no longer buy water from wells around the Roya river. This leads to the question: where does Monaco's water come from? The Principality was once supplied with water from Roya at a rate of 100 litres per second.

What happened to Monaco's water?

The Principality was once supplied with water from Roya at a rate of 100 litres per second. But storm Alex damaged infrastructure, causing a 25% loss in potable water from the Roya region. From their offices located above their water treatment plant on Princesse Grace avenue, the Sociéte Monégasque des Eaux manages all of Monaco's water.
