

## **New solar container capacity is expected to increase this year**

We expect this trend will continue in 2025, with 32.5 GW of new utility-scale solar capacity to be added. Texas (11.6 GW) and California (2.9 GW) will account for almost half of the new ...

Considering existing policies and market conditions, our main case sees 5 500 gigawatts (GW) of new renewable capacity becoming operational by 2030. This implies that global renewable capacity ...

We also expect battery storage to set a record for annual capacity additions in 2024. We expect U.S. battery storage capacity to nearly double in 2024 as developers report plans to add ...

This year's special focus is India, recognising the third-largest solar market, which more than doubled its installations in 2024. A 145% annual market increase in India meant 30.7 GW of new ...
