

Rfid tank circuit

However, even though they might be small in size, RFID tags contain very sophisticated technology that sets them apart from their predecessor - the humble barcode. RFID tags are made of three different ...

Figure 5 shows the typical response when turning a tank circuit on (i.e., applying a drive signal) and, after some time, switching the tank off again. It can be seen that the oscillations amplitude increases ...

NFC/RFID tag and antenna equivalent circuit Figure 3 shows the equivalent electrical circuit of an NFC/RFID tag chip and its antenna. The NFC/RFID chip is symbolized by a resistor R_{chip} ...

Abstract-- In this paper, we analyze one of the most common UHF RFID tag antenna structures, a T-matched dipole. We for the first time derive the closed-form solutions for the resonant frequencies of ...
