Can China dispose of decommissioned solar PV equipment by 2025?

In an announcement by the National Development and Reform Commission, China is targeting to build up a mechanism for disposing of decommissioned equipment in solar PV plants by 2025. It is also aiming to improve relevant standards and specifications for the recycling of decommissioned solar PV and wind power equipment.

Can China recycle decommissioned wind power & photovoltaic equipment?

BEIJING, Aug. 17 -- Chinese authorities have released guidelines to promote the recycling of decommissioned wind-power and photovoltaic equipment, the National Development and Reform Commission, the country's economic planner, announced Thursday.

Will China start a recycling system for retired solar PV panels?

Credit: EDP China has announced a plan to establish a recycling system for retired solar PV panels. In an announcement by the National Development and Reform Commission, China is targeting to build up a mechanism for disposing of decommissioned equipment in solar PV plants by 2025.

Can China recycle decommissioned solar panels?

In addition to encouraging solar PV manufacturers to proactively recycle decommissioned solar modules, the Chinese government also supports third-party recycling companies to carry out the recycling business of decommissioned solar PV equipment.

What is the Solar Energy Commission aiming to do?

It is also aiming to improve relevant standards and specifications for the recycling of decommissioned solar PV and wind power equipment. By 2030, the commission also aims to mature the full-process recycling system for solar PV plants, effectively matching the resource recycling capacity and decommissioning scale.

What is NDRC & NEA energy plan?

The plan clearly states that energy authorities of provinces (autonomous regions, and municipalities directly under the Central Government) must implement the requirements of this plan, compile regulatory capacity construction plans for their respective regions, and submit them to the NDRC and NEA before the end of June 2025.

Efforts will be coordinated to enhance the regulation capacity of renewable energy, and solar thermal power stations will be built in an adapted manner according to local conditions.
