

# Solar container machine sbu priority

Hi I have an off grid 11kw solar inverter. It's set to sbu mode. I have 5x48v 100AH lithium batteries. I want the inverter to utilize the batteries till 47 volts (back to grid voltage set right now) and then switch ...

Growatt????????????SPF 3000TL LVM-ES??????(2022.10.6??) ???????1 Output source priority: To configure load power source

I don't understand why this happens, but even if I change the values to "only solar" and "SBU priority", they immediately change the values back to "Utility first" and "USB priority". Even if I ...

You would need to set parameter 012 to 10%. This is labelled "Setting SOC point back to Utility Source where you selected "SBU" or "Solar First" in parameter 01. Once the battery SOC gets to the value you ...

2. SUB - It seems like this setting stands for Solar-Utility-Battery and, in theory, would blend power from sources in that order to meet the load demand? I've seen this on some lesser ...

Off-grid solar inverter >> Features Pure sine waveoutput Output power factor1.0 Programmable supply priority for PV,battery or Grid User-adjustable charge current and voltage Wide PV input range ...
