

# Stock market crash solar container battery

What happened to solar stocks in 2025?

Solar stocks experienced a dramatic selloff on Tuesday, June 17, 2025, as the U.S. Senate's version of President Donald Trump's tax bill maintained provisions to fully phase out renewable energy incentives by 2028. Major solar companies saw double-digit losses in premarket trading, with some stocks plummeting over 27% as investors fled the sector.

How did the Senate Bill affect the solar market?

The market reaction to the Senate bill was swift and severe, with leading solar companies experiencing catastrophic losses during Tuesday's trading session.

What are the key trends in PV & battery manufacturing?

In five key trends, pv magazine looks back over a year that saw PV module prices fall lower than many thought possible, while demand was restrained by grid congestion, among other challenges. Energy storage has had a strong year and geopolitics is seeing solar and battery manufacturing enter new regions as competition drives technical innovation.

How has the storage market changed in 2023?

BNEF also reported that prices for complete, "turnkey" systems were down 43% from 2023, while the stationary storage market has risen 61%. An increase in energy density was among the key trends in large-scale storage, as manufacturers innovated to squeeze more battery capacity into container-sized products.

Will solar oversupply continue in 2025?

Consulting firm InfoLink has predicted a small annual rise in global solar demand in 2025, but has noted there could actually be a retreat. Most observers expect PV oversupply to continue in 2025, with numerous bankruptcies among solar distributors and installers, while manufacturers are generally managing to hold on.

Are solar companies vulnerable to policy changes?

Individual company performance data underscores the sector's vulnerability to policy changes. Among the largest solar companies, First Solar trades at \$145.52 with a market cap of \$15.579 billion but shows negative returns across multiple timeframes, including a -17.43% year-to-date decline.
