

The latest compilation of china-eu solar container policies

China's rapid progress in the renewable energy sector is a key driver of its green transition, but has also been playing a pivotal role in advancing that of the EU. For example, in 2021, China ...

China's solar PV module exports hit 236 GW in 2024, with growth in all regions except Europe ... China exported 16.63 GW of modules in December 2024, up 9% MoM from 15.2 GW and ...

The solar photovoltaic (PV) industry has experienced rapid growth in recent years, resulting in a substantial increase in the amount of end-of-life (EOL) waste generated by these panels. Proper ...

The geopolitical implications of renewable energy involve changes beyond the immediate impact on energy and commodity streams. Energy policies of individual countries affect ...

The rapid deployment of solar power in China is the result of abundant solar resources and ambitious policy support, such as feed-in tariffs (FiTs) [7, 8]. However, while such progress has ...

According to InfoLink's customs data, China's module exports to the EU in 2022 and 2023 accounted for around 50% of the global total, and 35% for the first quarter of 2024, indicating ...

Over recent decades, China has risen to a preeminent global position in both solar photovoltaic (PV) adoption and production, a feat underpinned by a suite of pivotal policy measures. ...

This study employs the European Union (EU) and China as case studies to conduct a comparative analysis of their respective policies and practices regarding the management of used PV ...

[SMM Analysis] A Compilation of PV Market Policies at the National and Regional Levels Globally in September 2025, Categorized by China, Europe (EU), US, India, and Southeast Asia.

In this regard, concerns are mounting internationally over China's "New Three" industries policy, which now designates solar technology as a high-priority sector for national ...

From macro-level market and policy outlooks to practical business models and downstream insights, the Dialogue bridges theory and practice -- empowering you to navigate challenges and seize new ...

A comprehensive analysis of the 2025 European commercial and industrial photovoltaic policy map, focusing on deployment strategies, incentive comparisons, and zero-investment models to support ...

The latest compilation of china-eu solar container policies

Drawing on the China-EU photovoltaic "dumping case", we highlight some weaknesses in the EU's choice to resort to anti-dumping measures and emphasize the urgent need to invent new ...

A European organization of solar glass producers has filed another protest with the European Union over what it considers to be Chinese dumping policies. State subsidies are at the heart of the dispute. ...
