

Abstract: Vanadium extraction tailings of vanadium-titanium magnetite, as a by-product of vanadium extraction from converter vanadium slag, have great recovery value because of containing many ...

Perovskite-based solar cells have gained popularity due to their distinct electrical and optical features. Cesium titanium bromide (Cs_2TiBr_6) has a bandgap of 1.8 eV, making it a suitable ...

Vanadium Conferences lists relevant events for national/international researchers, scientists, scholars, professionals, engineers, exhibitors, sponsors, academic, scientific and university practitioners to ...

In this paper, the effects of various factors on the dynamic thermal performance of vanadium-titanium black ceramic solar collector were studied experimentally. To calculate the ...

On October 24, the theme speech of 2024 FerroAlloyNet 18TH Vanadium Industry Conference & Vanadium Battery Forum officially began. Industry experts and enterprise representatives focused on ...

Calcification roasting-acid leaching slag from vanadium-titanium ores (VTS) contains approximately 1 wt.% vanadium (V). This byproduct poses environmental risks due to its residual ...

Massive accumulation of vanadium-titanium magnetite tailings (VTMT)--a kind of common industrial solid wastes--will pose enormous harms to both ecological environment and economic development. ...

?: Pyroxene is arguably the most powerful, single-phase geochemical and petrologic recorder of Solar System processes, from nebular condensation through planetary evolution, over a wide range ...

Preparation, characterization, and reactivities of highly functional titanium oxide-based photocatalysts able to operate under UV-visible light irradiation: approaches in realizing high efficiency in the use of ...

FerroAlloyNet is going to hold the 20th Vanadium Products Forum & V-Battery Energy Storage Conference on 24-26 September, 2025 in Nanjing, Jiangsu, China. Under multiple pressures ...

If you're reading this, you've probably heard the buzz about vanadium energy storage conferences being the new 'Coachella for battery geeks.' But jokes aside, 2025 is shaping up to be a landmark year for ...

This study discusses the synthesis of vanadium-titanium oxide (VTO) thin films through the thermal oxidation process, which is employed for CO gas sensors. Initially, the vanadium-titanium ...

Vanadium titanium and solar container conference

Its influence and attention have been increasing year by year, making it one of the most influential events in the global titanium industry. So far, Baoji City has successfully held five ...

Solar simulator light was tested for the photodegradation process. Vanadium-doped titanium oxide nanoparticles (V-TiO₂ NPs) was successfully synthesized by a sol-gel technique and the solid-state ...

During the exhibition, a series of key activities will be held simultaneously, including the Titanium Industry Expo, the 2025 Annual Meeting of the Titanium, Zirconium, Hafnium and ...

The vanadium-titanium black ceramic solar collector (VTBCSC) shown in Fig. 1 is made of industrial waste vanadium tailings as the main raw material, coupled with cheap clay, and these ...

Vanadium titanium and solar container conference
