

Water cooler solar container

What is a portable solar powered cooler?

Portable solar powered coolers are a type of cooler that can be charged off of a wall outlet (120v or AC), 12v outlet (DC), or a portable power station. These coolers from Amazon get their energy indirectly from the sun, meaning they do not require additional ice for cooling. Instead, they can keep drinks at 0o C.

Can a solar powered cold room fit in a standard container?

Our solar powered cold rooms fit into standard overseas container. Re-furbish your used containers as cold chain hubs and retail units or use our ready-made solutions already pre-installed in a standard container.

What is a solar powered cooler used for?

The solar powered cooler is great for taking meals and beverages on picnics,to the beach,in an RV,or on a boat. They are also handy for those who want to help the environment but don't want to compromise on their favorite cold snacks and meals. Another widespread use for the solar powered cooler is camping trips.

How do solar coolers work?

Solar coolers can be charged by solar panel,charging from solar energy. This cooler can stay cold for hours without the need for ice. These coolers are portable and easy to move,making them ideal for camping or other outdoor activities where you may want to keep your food and drinks cold without relying on refrigeration.

How much does a solar powered cooler cost?

Generally,a solar-powered cooler can range from \$300 to \$1000. Smaller,portable solar-powered coolers designed for campsite or outdoor activities can be found at the lower end of this price range,typically between \$300 and \$500 on Amazon . These coolers usually have a capacity of around 30 to 50 quarts and can be powered by a single solar panel.
