

Zhonglian cement solar container explosion

What happened at a chemical plant in China?

At least five people have died and six more people are missing after a large explosion rocked a chemical plant in eastern China on Tuesday, according to local authorities. The blast spewed a towering plume of gray and orange smoke into the sky, damaged windows in nearby buildings and prompted a rescue operation.

What happened at a chemical warehouse in Tianjin?

In 2015 a series of blasts at a chemical warehouse in the northeastern city of Tianjin killed more than 100 people and sent toxic fumes into the air. At least five people have died and six more people are missing after a large explosion rocked a chemical plant in eastern China on Tuesday, according to local authorities.

Why did Shandong Youdao chemical explode?

The incident happened in the workshop of Shandong Youdao Chemical in Gaomi city, Shandong province, minutes before noon local time, state broadcaster CCTV reported. It did not give a reason for the explosion. A further 19 people suffered minor injuries, local authorities said in a statement.
